

## **Viterra Seeds Acquisition**

With the recent acquisition of Viterra Australia's AgriProducts division by Landmark Operations Ltd, the Viterra Seeds business has been incorporated into Seednet.

All Viterra Seeds varieties are now being managed by Seednet so seed of these varieties will be available via our network of Seednet Partners, and orders should now be placed directly with them.

Seednet is also managing the End Point Royalty system for Viterra Seeds varieties so all EPR payments for these varieties are now payable to Seednet, either direct or via Auto Deducting grain marketers.

We look forward to working with growers and agronomists to further develop Viterra Seeds varieties.
